

## DID YOU KNOW?

We offer **Vintage Veneer** species. If your design calls for a rustic vintage look, talk with us. We can send images, or samples of our current inventory. Let's quote your next project.

## VINTAGE VENEERS

Vintage Veneer is sliced from hand-hewn beams reclaimed from old farmhouses, barns, or commercial buildings. Preserving the natural character of the wood, the beams are washed, de-nailed, dimensionally sorted, and then sliced into veneer.

This veneer is generally with knotty characteristics that include splits, checks, nail holes, and occasional discolorations that reflect its history and give the wood a rustic feel. This veneer is sliced at 1.4 mm and intended for use in random sequences.

### VINTAGE EURO OAK

### VINTAGE KNOTTY SPRUCE

Vintage Euro Oak

Vintage Knotty Spruce

**PLEASE NOTE:**

*Photo images of each specie are just that, images. Actual veneers in inventory may vary depending on availability.*

We have your best interests in mind  
with every veneer we find.
