

DID YOU KNOW?

We offer **Rough Cut Veneer** species, perfect for that rough-sawn look. Logs are sliced with a sizable serrated knife producing a fascinating and touchable appearance. Dyes and stains will perform differently on Rough Cut Veneers because of the fluctuating surface. This creates a medley of visually interesting outcomes. Let's quote your next project.

ROUGH CUT VENEER SPECIES

carefree • composed • consistent

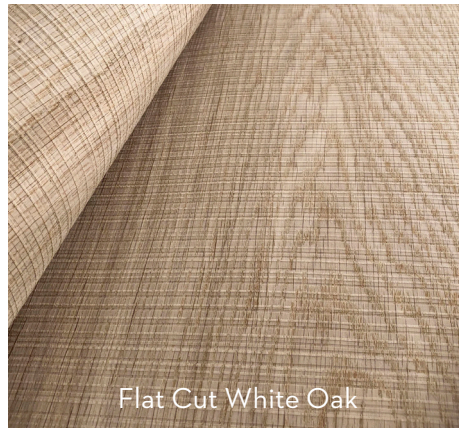

FLAT CUT WHITE OAK

QTD PLAIN FUMED EUCALYPTUS
